2. REVISION HISTORY

Date	Supersedes	Reason for Revision

3. OBJECTIVE AND SCOPE

This document is dynamic in nature and can be changed during the course of the project with suitable revision number.

4. INTRODUCTION

To provide the relation between system requirement specifications and installation & operational qualification documents to ensure that all the requirement as per the system requirement specifications.

5. TRACEABILITY COLUMN DETAILS

SRS Test Reference No.

System Requirement Specifications requirement should be listed.

SRS Test Description

System Requirement Specifications description should be listed.

 $\blacktriangleright GxP Impact? (Y/N)$

If Y, then there must be a test reference in column 5, or a reference showing that this requirement is verified in some other way.

 $\blacktriangleright \quad \text{Other Impact (} Y/N \text{)}$

The system may require some formal verification or testing for reasons other than GxP, and for which it would be good practice to trace from requirement through design to testing. It is recommended this column notes the reason for other impact.

Verification Test Reference No.

A reference must be present where GxP impact Y.

Remarks

Mentioned any remark that add information particularly where reference needs to be made to additional testing or requirements that have arisen as part of the excerise.

6. REFERENCES

The publication listed below form part of this protocol's reference documents. Each publication shall be the latest revision in effect on the date this protocol is approved for execution unless noted otherwise. Except as modified by the requirements specified herein or the details of the drawings, work included in this protocol shall conform to the applicable provisions of these publications.

7. ROLE AND RESPONSIBILITY

The validation team comprising of representative from each of the following departments should be responsible for overall compliance with this validation plan.

Department	Responsibilities		
	\succ To collect data necessary for the generation, execution of this protocol		
	from M/s		
	> To prepare the traceability matrix.		
Validation Agency	> To identify the system inventory and document the traceability matrix.		
	Comply with regulatory/Guidelines/Standards/validation plan		
	requirements throughout the validation life cycle.		
	> To submit validation documents for approval.
