

MICROBIOLOGY DEPARTMENT

STANDARD OPERATING PROCEDURE				
Department: Microbiology	SOP No.:			
Title: Cleaning and Operation of Vertical Autoclave	Effective Date:			
Supersedes: Nil	Review Date:			
Issue Date:	Page No.:			

1.0 OBJECTIVE:

To lay down the procedure for Cleaning and Operation of Vertical Autoclave.

2.0 SCOPE:

This SOP is applicable for cleaning and operation of autoclave in Microbiology laboratory.

3.0 **RESPONSIBILITY:**

Microbiologist- Quality Control Head- Quality Control

4.0 PROCEDURE:

4.1 General cleaning:

- 4.1.1 Clean the outer surface of vertical autoclave daily with a cleaned lint free cloth.
- 4.1.2 Drain water from chamber and clean inner surface of autoclave with 0.1 % v/v Teepol solution followed by 70 % v/v Isopropyl alcohol.
- 4.1.3 Frequency of cleaning: Outer surface daily and inner surface once in a week.
- 4.1.4 Record the cleaning of Vertical Autoclave as per "Annexure-I".

4.2 Precautions:

- 4.2.1 Check the calibration status of the pressure gauge, temperature indicator cum controller.
- 4.2.2 Do not open the lid of Autoclave, when cycle is on. Wait till it completes.
- 4.2.3 Take care while handling the articles as they will be hot, after cycle completion.
- 4.2.4 After completion of cycle, open the lid of Autoclave, when the pressure gauge shows "0" reading and temperature shows below 95°C.
- 4.2.5 Ensure that heating coils are completely submerged in water.
- 4.2.6 Use only purified water.
- 4.2.7 Use Heat resistance gloves and Protective goggle when loading and Unloading the material from autoclave.
- 4.2.8 Sample containing solvents or substances that may emit toxic fumes should not be autoclave.

4.3 Operation:

MICRORIOLOGY DEPARTMENT

		~~~	
D	STANDARD OPERATING PROC		
	ent: Microbiology aning and Operation of Vertical Autoclave	SOP No.:  Effective Date:	
Supersedes: Nil Review Date:			
Issue Dat		Page No.:	
4.3.1	Ensure that the instrument is clean and free from dust.	2.090	
4.3.2	Ensure that the main cord is connected to the main supply o	f electric power socket	
1.3.2	Unscrew the locking knob and lift the top lid by turnin	•	
4.3.3	direction.	g top mang level in undertockwise	
4.3.4	Ensure that drain valve is closed and purified water is up to	the basket stand.	
4.3.5	Place the glassware/Media /Garment/Accessories in the Aut	coclave as per Annexure-II.	
4.3.6	Place chemical indicators at predetermined locations.		
4.3.7	Put the load sensor is at desired location.		
4.3.8	Close the top lid and tight the knob diagonally with equal property	ressure and Close the release valve.	
4.3.9	Switch ON the main supply. Temperature as well as pressur	re within the autoclave will start	
	increasing.		
4.3.10	Press start button, heater bank will start, purging will be bet	ween 100°C -105°C.	
4.3.11	Sterilization shall be start for 20 Minutes at 121.1°C for n	nedia and 30 Minutes at 121.1°C for	
	Media Destruction.		
4.3.12	After Completion of the cycle, exhaust phase will start.	Steam will start exhausting from	
	purging valve.		
4.3.13	Open the lid of autoclave, when temperature is below 9	0°C and pressure gauge shows "0"	
	reading and remove the articles from autoclave.		
4.4	Controller operating		
4.4.1	Press "F" and "Enter" key simultaneously for 2 seconds.		
4.4.2	Display "0.0", use UP key and make display = 40.0 (passwo	ord)	
4.4.3	Press "Enter", Display will show Pt-I (Purge OFF)		
4.4.4	Press "Enter", Change the value by using "UP" or "DOWN	" key. Default purge OFF=105°C	
4.4.5	Press "ENTER", display will shows PUrg (Purge ON)		
4.4.6	Press ENTER, Change the value by using "UP" or "DOWN	" key. Default purge $ON = 100$ °C	
4.4.7	Press "ENTER" Display shows "Prop" (Internal setting)		
4.4.8	Press "ENTER", Display will show some valve 0.50 (Don,	t change it)	
4.4.9	Press "ENTER" Display show "Int" (internal setting)		
4.4.10	Press "ENTER" Display will show some valve 255.0 (Don'	t change it)
