**PERFORMANCE QUALIFICATION PROTOCOL FOR DRYING OVEN**

**1.0 Objective:**

- To establish documented evidence which will provide a High degree of assurance and reliability about the performance of the Drying Oven.
- To determine that the Drying Oven performs as intended by repeatedly running the system on its intended schedules and recording all relevant information and data. Results must demonstrate that performance consistently meets predefined specifications under normal conditions and where appropriate for worst case situations.

**2.0 Scope:**

**Scope is limited to the following**

<b>Equipment / System Name</b>	<b>Drying Oven</b>
<b>ID Number</b>	.....
<b>Location</b>	<b>Wash Room</b>

**3.0 Performance Verification Checklist:**

Verify the performance of all the critical process/functions as per their respective procedure. Refer Performance Verification Checklist as per Annexure - I.

**4.0 Any Changes/Deviations identified during operating checks:**

Refer Annexure – II.

**5.0 Recommendations and Conclusions:**

**PERFORMANCE QUALIFICATION PROTOCOL FOR DRYING OVEN**

**6.0 References:**

- Installation Qualification
- Operational Qualification
- Standard Operating Procedure

**7.0 Annexure**

- Annexure - I : Performance Verification Checklist
- Annexure - II : List of Changes / Deviation.
- Annexure - III : Performance Qualification Report.

**8.0 Abbreviations:**

- SOP : Standard Operating Procedure
