Risk Analysis Study Protocol cum Report for Process Mapping from Dispensing to Dispatch

| PAGE No.: 2 of 69 |
|-------------------|

| PAGE N | lo.: 2 | 2 of 69 |
|--------|--------|---------|
|--------|--------|---------|

- 1. OBJECTIVE: To provide the documented evidence that there is low level of risk during process from Dispensing to Dispatch.
- 2. SCOPE: The scope of this document is limited to Risk Assessment of Process Mapping from Dispensing to Dispatch in Oral Dosage section of facility.

3. RESPONSIBILITY:

| Department | Responsibility |
|----------------------------|---|
| Quality Assurance | Preparation, Review, and Compilation of FMEA. |
| | Post Approval of FMEA. |
| Warehouse | • Review of FMEA. |
| Production (Manufacturing) | • Review of FMEA. |
| Production (Packing) | • Review of FMEA. |

4. REASON FOR RISK ANALYSIS:

To mitigate & monitor the risk associated with the Process Mapping from Dispensing to Dispatch.

5. SITE OF STUDY:

6. RISK COMMUNICATION & TRAINING:

- The Risk analysis team shall be authorized by the Head-QA or his/her designee.
- Quality Risk Management Team shall be cross functional team comprised of expert from different areas.
- Training shall be imparted to the concerned team.
