Name	Designation	Signature	Initial	Date

M/s

Name	Designation	Signature	Initial	Date

3. REVISION HISTORY:

Date	Supersedes	Reason for Revision

System Name: Warehouse

System ID:

4. OBJECTIVE:

5. SCOPE:

This document is applicable to validation for Hardware and Software system of Warehouse installed after modification at M/s. This installation qualification shall define the documentation, references and acceptance criteria for validation of Hardware and Software system of PM_STORE is installed in accordance with the guidelines laid down by the manufacturer of the system.

6. SYSTEM DESCRIPTION:

Computer system of Warehouse defines to the system is use to calculating analytical data and protect with protected sheet by MS EXCEL. This system is also use to Mailing for document per pass, ERP (Enterprise resource planning) for management information system integrates areas. Control panel and other external device disable for this system to protect data and piracy and Data store within the system.

System Name: Warehouse

System ID:

7. ROLE AND RESPONSIBILITY:

The validation team comprising of representative from each of the following departments should be responsible for overall compliance with this validation plan.

Department	Responsibilities		
	To collect the necessary data for installation qualification activities.		
	\succ To prepare and execute the installation qualification in coordination with		
Validation	engineering, validation and quality assurance team.		
Agency ()	> Comply with regulatory / Guidelines / Standards / validation plan requirements		
()	throughout the validation life cycle.		
	To submit installation qualification for approval.		
Engineering	> To provide the necessary data for installation qualification activities.		
(M/s)	> To review the installation qualification.		
IT	> To provide the necessary data for installation qualification activities.		
(M/s)	To review the installation qualification.		
Warehouse	To provide the necessary data for installation qualification activities.		
(M/s.)	➤ To review the installation qualification.		
Quality			
Assurance	To approve and authorized the installation qualification.		
(M/s)

System ID:

9. DOCUMENTATION PROCEDURE:

- Qualification activities will be performed as defined in the approved document.
- All documentation will be completed during the execution of the qualification.
- Recording of information will be made in permanent ink.
- Fill out complete information in the verification table provided.
- Do not keep any space blank. Mark blank space with a single line throughout the appropriate space with mentioning NA (Not Applicable) and put initial and date.
- Correct the mistakes by drawing a single line through the incorrect data, recording the correct information and then initial sign and date the change.

10. QUALIFICATION COMPLETION AND APPROVAL:

- Verify that all tests required by qualification are completed and attached.
- Verify that all amendments and discrepancies are documented, approved and attached.
- If all items in the qualification for the validation to Hardware and Software system of WAREHOUSE been reviewed and found to be acceptable, sign the corresponding block in the qualification completion and approval form.

11. ACCEPTANCE CRITERIA:

- Installation completion as per manufacturer's recommendations & cGMP requirements.
- Installation of major components as per the design specifications.
- The supply of all necessary documentation from manufacturer.

INSTALLATION QUALIFICATION FOR COMPUTER SYSTEM OF WAREHOUSE

System Name: Warehouse

System ID:

12. INSTALLATION VERIFICATION TEST:

12.1 Identification of System Details

Objective	:	This test sheet is intended to verification of equipment details.
Tools Required	:	Not Applicable
Procedure	:	1. Record Equipment Name
		2. Record Identification No.
		3. Record Equipment Location
Acceptance	:	Data recorded from the equipment shall match with the data specified in
Criteria		verification table.
1	:	Data recorded from the equipment shall match with the data specified in

Verification Table:

Equipment Details	Specified As	As observed	Discrepancy? (Y/N)
Equipment Name	WAREHOUSE		
Identification No.			
Location	STORE OFFICE		

Meet the acceptance Criteria [] Yes [] No	
Checked by :			Date:
Verified by :			Date:

INSTALLATION QUALIFICATION FOR COMPUTER SYSTEM OF WAREHOUSE

System Name: Warehouse

System ID:

12.3 Verification of Capacity Requirement:

Objective	To verify the processing capacity of Computer System			
Tools required	: Not Applicable			
Procedure	: Physical verification of Capacity Requirement as per SRS			
	1. Not more than 50% of the processing capacity			
	2. Not more than 50% of the installed physical memory			
	3. Not more than 50% of the installed hard disk capacity in PC			
	components should be consumed by installed software.			
Acceptance	: 1. Capacity Requirement of the control system shall match with			
criteria	SRS.			

Verification Table:

S.No.	Item Name	Expected	Actual (Yes/No)	Discrepancy? (Y/N)
1.	Processing Power	Not more than 50% of the processing capacity		
2.	Memory	Not more than 50% of the installed physical memory		
3.	Local Electronic Storage	Not more than 50 % should be consumed by installed software

12.5 Verification of Software Components:

Objective	: To verify the installed software components as per the SRS.	
Tools Required	: Not Applicable	
Procedure	: 1. Verify Software Name.	
	2. Verify Software Version	
	3. Verify operating system.	

4. Verify software backup availability.

Acceptance Criteria : Installed software component should match with SRS.

Verification Table:

A. For Software Components:

S.No.	Software Name	Version	Installation (Yes/No)	Discrepancy? (Y/N)
1.	Adobe Reader			
2.	Google Chrome			
3.	Mozilla Firefox	59.0		
4.	Windows 10 Pro	1803		
5.	SAP GUI for windows 7.30	7.30 Compilation 1		
6.	WinRAR 5.20 (64-bit)	5.20.0		

B. Operating system details:

S.No.	Window	Product key/ Liecence key	Discrepancy? (Y/N)
1	Windows 7		

C. Software Backup Availability:

S.No.	Available (Yes/ No)	Discrepancy? (Y/N)

12.11 Verification of General System Installation:

Objective	:	To verify the general system installation.
Tools Required	:	Not Applicable
Procedure	:	1. Check all the test given in verification table.
		2. Record the result in verification table.
Acceptance	:	All the test result should match with expected result.
Criteria		

Verification Table:

Description	Expected Result (Yes/No)	Discrepancy? (Y/N)
Major components should be protected from shock.		
No visible physical damage should be available.		
Sufficient space should be available for maintenance.		
System identification name plate should be available.		
System should be installed with all necessary instruments.		
Earthling should be connected properly.		
Power and signal cable should be separate.		
Unterminated and broken wire should not be open.

13. INSTALLATION QUALIFICATION TEST STATUS:

The installation qualification test status is as per below mentioned table.

Test Description	Status (Pass / Fail)	Discrepancy? (Y/N)
Identification of System Details		
Verification of Master Documents		
Verification of Capacity Requirement		
Verification of Hardware Components		
Verification of Software Components		
Verification of Physical and Logical Security Control		
Verification of Test Instruments Calibration and Traceability		
Verification of Power Utility		
Verification of Environmental Condition		
Verification Of Communication Link Between Server To Computer		
System		
Verification of General System Installation		

System Name: Warehouse

System ID:

14. DISCREPANCIES HANDLING DURING COMPUTER SYSTEM QUALIFICATION:

- In case of discrepancy observed during qualification, document in the defined column in each table and document the details of the observation in the discrepancy log sheet.
- Inform to User, engineering and quality assurance about discrepancy.
- Investigate the discrepancy and ensure the possible impact.
- If discrepancy does not have potential to impact on operation as well as performance of the system, close the discrepancy with proper justification.
- The User, engineering and QA will decide whether discrepancy is acceptable or not.
- If discrepancy is acceptable, provide conclusion and recommendation if any into respective column.
